

Data Sheet

ULTRA-TURRAX UTL 1000/20

ULTRA-TURRAX UTL 1000/20

The lower-priced ULTRA-TURRAX UTL 1000 machines are particularly multifunctional and are used for the mixing, dispersing (emulsifying/suspending) and homogenizing of solid and liquid substances up to viscosities of several thousand mPa-s, such as honey, plastic masses and crèmes. The mixing components are fed into the machine at the inlet connection. The materials are mixed, homogenized and then discharged from the machine via the outlet connection. The machine does not have automatic suction, but does have a conveyor height of up to 20 meters.

Technical Data

Flow rate (max.)	17000 l/h
Motor power min.	22 kW
Motor power max.	30 kW
Ident. No.	UTL1000/20
